Comments	
Subject description	
<p>In order to be successful in and out of school, students need to learn a set of social and emotional competencies—cooperation, assertiveness, responsibility, empathy, and self-control—and a set of academic competencies—academic mindset, perseverance, learning strategies, and academic behaviors. The eighth-grade advisory is designed to help students develop these skills through discussions, reflections, and project-based opportunities for community building and engagement. In addition to these social, emotional, and academic skills, the eighth-grade advisory also guides and supports students through the secondary school application and selection process.</p>	
Narrative 2024-2025	
<p>Ella has been an incredibly hard-working, thoughtful, and organized member of the eighth-grade cohort this semester. Motivation to excel in school has been evident in every aspect of Ella's academic work, from how assignments were completed with intense precision to the ways Ella has actively and consistently sought feedback from teachers. Organizational and executive functioning skills have come naturally to Ella, and this has contributed to a high level of success both in and outside of the classroom. Ella has often utilized downtime at school effectively by getting ahead on assignments and refining work when appropriate. In general, Ella has demonstrated an impressive ability to manage time and tasks with efficiency.</p> <p>In addition to academic excellence, Ella has continued to be a beloved friend and trusted companion to classmates. Ella's thoughtful, well-reasoned advice has been sought by many in the eighth grade, and Ella's ability to offer perspective and guidance has made a positive impact on the class. A warm personality and willingness to engage with others have made Ella a welcoming presence throughout the CFS community, and Ella has enjoyed building connections with adults and students of all ages across the school. Overall, Ella has been a reliable, insightful, and positive force within the eighth grade this semester.</p>

	Gr 8 Fall
English	
<i>Determines a theme or central idea of a text and analyzes its development over the course of the text, including its relationship to the characters, setting and plot</i>	4
<i>Analyzes how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision</i>	3
<i>Makes inferences about setting, plot, characters, and events, and supports them with evidence from the text</i>	3
<i>Uses evidence from texts effectively to strengthen arguments and prove a thesis in an essay</i>	3
<i>Organizes ideas in writing in a way that makes sense of their purpose. Essays may include an effective rebuttal to anticipated counter claims.</i>	4
<i>Writes with a clear voice and style appropriate for the piece of writing</i>	4
<i>Accepts and incorporates peer and teacher feedback to improve writing pieces</i>	4
<i>Applies revision and editing techniques to polish writing pieces effectively</i>	4
<i>Employs proper use of punctuation</i>	3
<i>Uses effective techniques, relevant descriptive details, and well-structured event sequences to capture experiences in personal essay</i>	4
<i>Engages thoughtfully with independent reading</i>	3
<i>Uses precise words and phrases to capture and convey experiences and information</i>	4

8th Grade Humanities - Christopher Gandolfo-Lucia

	Gr 8 Fall
History	
<i>Understands and is able to analyze a text for bias and subjectivity</i>	4
<i>Constructs a historical argument and uses evidence to support it</i>	N/A
<i>Explains causes and effects of historical events</i>	N/A
<i>Analyzes primary source documents for purpose, audience, and message</i>	N/A
<i>Understands the difference between primary and secondary sources</i>	N/A
<i>Examines current events through a historical lens</i>	4
<i>Explains the historical attitudes and treatment of marginalized communities in the U.S. and the major events, leaders, and changes in the rights of those groups over time.</i>	3
<i>Understands the relationship between economic, political, and social change, as well as the ways in which they intersect.</i>	N/A
<i>Analyzes and interprets geographic information</i>	N/A
<i>Analyzes and explains the meaning and context of visuals</i>	N/A
<i>Describes the United States' form and structure of government</i>	N/A
<i>Uses comparative techniques to describe the form and structure of non-US governments</i>	N/A
Research	
<i>Perseveres through the inquiry process, including the development of appropriately rigorous research questions</i>	N/A
<i>Identifies and uses credible sources when conducting research</i>	3
<i>Presents research in an organized, coherent, and polished manner</i>	N/A

<i>Takes effective notes that summarize relevant information concisely</i>	3
<i>Discusses social issues thoughtfully and respectfully</i>	3
<i>Interacts with adults in a positive and productive manner</i>	4

8th Grade Humanities - Christopher Gandolfo-Lucia

		Gr 8 Fall
Comments		
Subject description		
<p>This course investigates the categories that make up “identity” as understood in contemporary culture and politics. We invited students to think widely about the terms they use to define themselves; this focus helps to forge a classroom community where students feel comfortable and encouraged to share personal experiences and perspectives. Students read independent reading books featuring diverse voices and think collaboratively about the importance of representation in literature, film, and television. The first half of the CFS Eighth Grade Humanities course focuses entirely on essay writing. Students practice a complete writing process involving planning/prewriting, drafting, revising, editing, and proofreading/publishing. Via this practice, each student crafts a personalized writing process that emphasizes their strengths and supports areas of challenges. Throughout all essay units, students engage in the process of self-editing, learning the art of taking constructive feedback from both peers and teachers. For each essay, students submit a rough draft and have a 15-minute conference with their Humanities teacher to discuss specific revision points regarding mechanics, punctuation, organization, support, clarity of writing, and flow of argument. This conference-based writing workshop allows each student an opportunity to practice specific skills and areas for growth that are uniquely relevant to their profile as a writer. This fall semester, students practiced three distinct forms of essay writing: persuasive essay, personal essay, and literary analysis essay. Through a unit studying casting processes and minority representation in film, students practiced crafting persuasive arguments regarding the moral, social, and economic considerations that casting directors should evaluate when casting for roles with marginalized identities. Following this unit, students interrogated their own beliefs by writing personal essays. In this unit, students had the choice between supporting their beliefs with narrative essays and expository evidence drawn from history, culture, science, and personal experience. To conclude the semester, students practiced literary analysis essays through an Ursula K. Le Guin author study, during which students read and analyzed the themes of the following stories: “The Wife’s Tale,” “The Ones Who Walk Away From Omelas,” and “The Author of the Acacia Seeds’ and Other Extracts from the Journal of the Association of Therolinguistics.” In addition to this primary focus on essay writing, students have maintained an independent reading routine that involves 45 minutes of independent reading in class each week. Independent reading is evaluated through oral presentations at an interval of 8-10 weeks. In the second half of the year, students will practice research and oral presentation skills through a variety of independent and collaborative project-based assignments. These projects are open-ended and encourage students to employ a variety of interdisciplinary skills: in addition to relying on brainstorming skills and a complete writing process, for these projects, students will make use of data analysis skills, performing and visual arts skills, production design skills, creative writing skills, and other multi-disciplinary skills.</p>		
Narrative 2024-2025		
<p>Ellahas approached humanities class with an impressive work ethic and an eagerness to master the writing skills and techniques practiced this semester, often using class readings and essay assignments as jumping-off points for further independent reflection and writing. Ella's writing has indicated a clear capacity for sustained, rigorous intellectual work as well as an admirable willingness to solicit and incorporate feedback as a primary mode for growth. Accordingly, Ella's primary focus as a writer this semester has been revision, and a goal for Ella throughout the coming semester will be to continue building a set of tactics for independent revision. As a reader, Ella has been enthusiastic about whole-class readings, motivated to attempt mature texts for independent reading, and insightful when discussing and writing about literature. During class discussions, Ella has contributed by presenting well-reasoned, thoroughly supported theories and has helpfully based arguments in specific references to class readings, often helping relate other students' points to specific moments in the texts as well. Overall, Ella has been an outstanding student in humanities class this semester.</p>

8th Grade Math - Karen Harvey

	Gr 8 Fall
Math Skills	
<i>Able to use distributive property when solving equations or simplifying expressions.</i>	3
<i>Able to set up proportions</i>	3
<i>Able to perform all operations on real numbers.</i>	3
<i>Able to graph quadratic functions</i>	N/A
<i>Able to solve equations with variable on both sides.</i>	3
<i>Able to solve multi-step linear equations.</i>	3
<i>Able to analyze linear equations that contain two variables, and how these can be represented by graphical lines and tables of values</i>	3
<i>Able to graph linear equations and functions</i>	3
<i>Able to identify unique characteristics of, and graph horizontal and vertical lines.</i>	3
<i>Able to find slope of a linear function visually from a graph (rise over run) or calculate from a table ($m = \frac{y_2 - y_1}{x_2 - x_1}$).</i>	3
<i>Able to solve various word problems that involve real world relationships that can be represented by linear equations or functions</i>	3
<i>Able to write an equation in standard form ($Ax + By = C$) from a graph or from a linear equation in non-standard form.</i>	3
<i>Able to write linear equations in slope intercept form ($y = mx + b$) from graphs, tables and word problems.</i>	3
<i>Able to graph linear inequalities and compound linear inequalities</i>	3
<i>Able to identify the number of solutions of a linear system of equations.</i>	3
<i>Able to interpret systems of inequalities (multiple inequalities at the same time) and use them to describe real-world situations</i>	3
<i>Able to solve systems of simple linear inequalities by creating graphs.</i>	3
<i>Able to construct, analyze, graph, and interpret basic exponential functions of the form $f(x) = a(r^x)$</i>	N/A
<i>Able to identify exponential functions using graphs and/or tables.</i>	N/A
<i>Able to apply exponent properties involving products, powers of a power, and quotients.</i>	N/A
<i>Able to add and subtract polynomial expressions</i>	N/A
<i>Able to multiply polynomial expressions</i>	N/A
<i>Able to differentiate between monomials, binomials and polynomials, identify the degree of polynomial and leading coefficient.</i>	N/A
<i>Able to solve quadratic equations using square roots.</i>	N/A
<i>Able to identify quadratic functions in equation and graph form, and state their properties (vertex, axis of symmetry, relationship to parent quadratic function).</i>	N/A
<i>Able to use the discriminant to determine the number of solutions to a quadratic equation.</i>	N/A
<i>Able to simplify radicals without and with variables.</i>	N/A

8th Grade Math - Karen Harvey

	Gr 8 Fall
Identify, Solve, Simplify Linear equations, Quadratic Equations and Factor Polynomials	
<i>Able to solve systems of linear equations using algebraic methods</i>	3
<i>Able to visualize linear systems and systems of linear inequalities using graphing calculator technology</i>	3
<i>Able to solve quadratic equations using the quadratic formula</i>	N/A
<i>Able to identify and combine like terms</i>	4
<i>Able to distinguish between expressions and equations</i>	4
<i>Able to simplify expressions</i>	4
<i>Able to identify, define, and determine opposites and absolute values of integers</i>	3
<i>Able to evaluate, graph, analyze, and create various types of functions</i>	3
<i>Able to solve linear inequalities</i>	3
<i>Able to write linear equations in point-slope form $(y - y_1) = m(x - x_1)$ from graphs and tables; given a point-slope equation, able to graph it.</i>	3
<i>Able to solve compound linear inequalities</i>	3
<i>Able to solve one-step linear equations</i>	3
Math Work Habits	
<i>Comes to class prepared and on time</i>	3
<i>Takes notes and uses notes successfully on open book tests</i>	3
<i>Completes homework assignments on time</i>	3
<i>Thoroughly completes class and homework assignments</i>	4
<i>Participates cooperatively and actively (volunteers, asks questions, engages with concepts and materials) in class</i>	3
<i>Advocates for support when needed</i>	3
<i>Demonstrates attentive and positive attitude</i>	3

Grade level: 8th Grade

8th Grade Math - Karen Harvey

	Gr 8 Fall
Comments	
Subject description	
<p>In 8th grade math, students have engaged with a range of topics that build critical algebraic and statistical skills. The year began with graphing linear equations, where students learned to plot points and understand the relationships represented by linear graphs. They progressed to writing equations and expressions derived from real-world problems and data tables, enhancing their ability to translate between different representations of mathematical relationships. Next, students explored graphing inequalities and solving systems of equations and inequalities, developing strategies to find solutions and interpret their meaning in various contexts. Additionally, the class analyzed two-way data tables, gaining the ability to interpret and organize categorical data effectively. To round out their statistical understanding, students examined correlation coefficients and lines of best fit, learning to interpret statistical relationships and trends within data sets. This comprehensive approach has provided a strong foundation for advanced mathematical concepts and real-world applications.</p>	
Narrative 2024-2025	
<p>In class this fall, we began by assessing students' areas of need for additional support. After that, we quickly moved into solving linear equations, writing equations and expressions from given examples. The class then tackled systems of equations using the elimination method and learned how to graph these systems. As we progressed into the second half of our unit on equations and inequalities, students refined their skills in graphing linear inequalities and creating systems of inequalities from word problems. Our current focus is on two-variable statistics, where we are investigating correlation versus causation, calculating the line of best fit using graphing technology, interpreting what the line of best fit reveals about the problem, determining residuals, and estimating the correlation coefficient from a graph.</p> <p>Will Richards benefits greatly from being challenged academically and has shown strong progress in math this semester. One of Will's key strengths is the ability to analyze word problems and generate linear equations and inequalities, successfully answering multiple related questions. Will consistently demonstrates the ability to manipulate linear equations to solve for different variables and determine equivalent equations and expressions. An area for growth is checking work for accuracy, as small computation errors occasionally arise and can affect the final answer. With continued focus on this, Will is well-positioned for success throughout the rest of the year.</p> <p>This fall, we began by focusing on where students felt they required more support. Once those areas were identified, we moved on to solving linear equations, learning how to write equations and expressions from examples. The class then worked on solving systems of equations using the elimination method, followed by graphing these systems. In the second part of our unit on equations and inequalities, students practiced graphing linear inequalities and creating systems of inequalities from real-world word problems. Our current unit focuses on two-variable statistics, including analyzing correlation versus causation, using technology to find the line of best fit, interpreting the significance of the best-fit line, determining residuals, and predicting the correlation coefficient from a graph.</p> <p>Ella has truly shined in math this year, demonstrating strong growth and motivation. A noticeable increase in fluency with math facts has greatly improved problem-solving speed and efficiency, allowing for more focus on complex concepts. Strong skills in solving, graphing, and interpreting linear equations and inequalities have also been a highlight, showcasing a solid understanding of these areas. It's been wonderful to see Ella take on this level of motivation, showcasing capabilities as a math student. An area for growth is interpreting word problems. Occasionally, errors occur due to misunderstandings of what a problem is asking. Regular practice in this area will support continued growth in mathematical reasoning. With continued determination and focus, the rest of the year promises to be a success for Ella.</p>

8th Grade Science - Carolyn Sohn

	Gr 8 Fall
Science Skills	
<i>Constructs and records close observations of the natural world, and able to asks questions about what is unknown</i>	3
<i>Can independently use the scientific method to answer scientific questions through investigation</i>	3
<i>Organizes data in appropriate form for interpretation and recognizes patterns in data</i>	3
<i>Includes reason and/or evidence to support scientific arguments or conclusions</i>	3
<i>Systems thinking: understands specific information in the context of large scale natural systems, patterns, and cycles</i>	4
<i>Uses class time constructively and works in a focused manner</i>	4
<i>Communicates original findings and understanding through writing, speech, and project work, tailoring communication to specific audiences</i>	3
<i>Demonstrates understanding of concepts, facts and vocabulary during class discussions</i>	3
<i>Demonstrates understanding of concepts, facts, and vocabulary in written work and projects</i>	3
<i>Awareness of individual level of comprehension and uses available resources to further their learning</i>	4
<i>Participates actively and engages in an appropriate manner in lessons and activities</i>	4
<i>Approaches work with curiosity, openness to new experiences, and demonstrates a growth mindset</i>	4
<i>Perseveres on difficult tasks and in problem solving</i>	4
<i>Engages in self-directed learning: setting goals, striving to meet them, and evaluating progress</i>	4
<i>Completes homework thoroughly and on time</i>	4
<i>Records and communicates observations and thinking to others</i>	3
<i>Demonstrates cooperative learning by supporting intellectual risk-taking, actively listening, and participating positively in group work</i>	3

8th Grade Science - Carolyn Sohn

	Gr 8 Fall
Comments	
Subject description	
<p>Eighth-grade science begins with an exploration of chemistry. In the first unit, "Properties and States of Matter," students gain an understanding of the molecular motion of matter and how scientists classify matter. In this unit, students explore the first inquiry investigation in which they write and implement their own lab procedure to answer the investigation question: "What happens at a molecular level when thermal energy is added to a substance?"</p> <p>Students then explore the foundational elements of chemistry: atomic structure and the periodic table. Students are then introduced to the basic structure of atoms and the properties of subatomic particles, then take time to explore the periodic table once they understand how to interpret terms like "atomic mass." The periodic table is taught using both digital and physical exploration activities as a tool for understanding chemistry and how elements behave.</p> <p>Students each do a deep dive into one element through the "Element Baby Book" project, in which they "adopt" an element and create a scrapbook-style "baby book" using research they do on that element's history, properties, and uses. By the end of this project, students demonstrated a deeper understanding of an element's structure and properties, as well as connected that element to similar elements on the periodic table.</p> <p>The next unit covers atomic bonding and chemical reactions. Students start by learning different types of bonding through a variety of digital simulations and physical activities. Once the bonding concepts are mastered, students learn more about how breaking and forming bonds connect with chemical reactions. Chemical reactions are brought to life through teacher demonstrations and hands-on labs. The unit includes the lab investigation: "Conservation of Mass: How Does the Total Mass of the Substances Formed as a result of a Chemical Change Compare With the Total Mass of the Original Substances?" This investigation brings to life paper-and-pencil chemical equations by giving students the opportunity to carry out several chemical reactions.</p> <p>Students tackle the final chemistry unit, acids and bases, after winter break. This unit pushes students to build upon their understanding of chemical reactions by adding on the concept of acid-base reactions. This unit incorporates inquiry activities and focused lab investigations, such as a cabbage juice pH lab. In the cabbage juice lab, students classify known household substances such as vinegar and soap as strong/weak acids or bases by using the juice of a red cabbage. Students create and test their own cabbage juice color pH scale, then test the scale using substances with known pH values.</p>	
Narrative 2024-2025	
<p>Ella has taken to chemistry like a duck to water. From the first few chemistry lessons of the year, Ella's excitement was palpable. Ella has consistently engaged in conversations with the teacher about higher-level chemistry concepts not usually covered until high school or even college! Ella works collaboratively with friends but equally enjoys working independently when a topic is particularly engaging. Ella immediately begins homework as soon as it is distributed in class due to a strong desire to learn new concepts. While starting homework in class Ella will often ask additional questions as to the "why" behind new concepts. Ella has greatly enjoyed the chemistry labs in this unit and has applied the same dedication seen in day-to-day classwork to the lab process. Ella's post-lab write-ups have been very thorough and clearly thought out, especially when it comes to identifying potential experimental errors and how the methods could be improved if the experiment were to be repeated. Not surprisingly, Ella's element baby book project on arsenic was full of wonderful details and showed clear passion for the topic. Within the book, Ella's "baby narrative" page (which incorporated basic information about the element) was especially clever, alluding to the dangerous properties of the element by claiming that within arsenic's "first day at home," it lit the entire room on fire. Going into the second half of the year, Ella is sure to love physics just as much as chemistry and is encouraged to keep up the excitement for science that was unlocked in the chemistry unit.</p>

8th Grade Spanish - Jose Lopez Espinosa

	Gr 8 Fall
Spanish Skills	
<i>Creates a Boardgame Project using questions and challenges practiced in class (100-200) using the past tense, the present and the future tenses.</i>	4
<i>Researches the Spanish cultural traditions or current events and writes paragraphs informing to the class about it (including an oral presentation)</i>	4
<i>Helps to set up the Day of the Dead altar from beginning to end</i>	4
<i>Illustrates ability to understand text in Spanish (quizzes and homework)</i>	4
<i>Participates in Spanish (simple but longer sentences in their responses)</i>	4
<i>Responds to and formulates questions using more complex interrogatives and combinations</i>	4
<i>Shows understanding of introduction to the imperfect and the conditional tenses in the indicative form</i>	4
<i>Continues and finishes their Alebrije Project making it a final product and colorful following the PBL (Project Based Learning Standards)</i>	4
<i>Demonstrates knowledge through projects and presentations using the time wisely (self-direction)</i>	4
<i>Relates ideas about one's own culture and elicits information from others making connections, comparisons between and communities using L2</i>	4
<i>Designs a movie trailer using the content taught in class (project)</i>	4
<i>Completes daily homework assignments on time</i>	4
<i>Asks questions, takes notes, engages with concepts and materials</i>	4
<i>Seeks assistance when needed</i>	4
<i>Comes to class prepared</i>	4
<i>Demonstrates attentive and positive attitude</i>	4
<i>Distinguishes differences in usage of the verbs SER, ESTAR, HABER</i>	4
<i>Constructs the present progressive forms of verbs (with ESTAR)</i>	4
<i>Conjugates stem-changing verbs in the present tense</i>	4
<i>Conjugates regular verbs in the preterit (past) tense</i>	4
<i>Makes comparisons using comparative words</i>	4
<i>Use possessive adjectives to indicate ownership and relationships</i>	4
<i>Illustrates knowledge of more complex grammar and word order by writing e-mails, post cards, journal entries, and short letters to peers</i>	4
<i>Listens attentively and follows directions</i>	4
<i>Thoroughly completes assignments</i>	4
<i>Understands and knows to use the past, present, and future tenses when speaking, writing, reading and listening in Spanish.</i>	4
<i>Knows how to identify and use the imperfect, conditional, the present subjunctive, commands, present, progressive, and the P.P.</i>	4

8th Grade Spanish - Jose Lopez Espinosa

	Gr 8 Fall
Comments	
Subject description	
<p>Eighth-grade Spanish continues with a review of the basic structures from fifth, sixth, and seventh grades with new vocabulary and grammar that serves to broaden the speaking, reading, listening, and writing of Spanish. It also provides students with an understanding and appreciation of cultures other than their own when the students compare and connect any Latinx culture and communities with the American culture. Students acquire a working knowledge of a wide variety of grammatical structures and continue to learn to speak Spanish with more accuracy, expanding their understanding of the language and improving fluency, pronunciation, rhythm, and intonation when speaking Spanish. The students graduate knowing how to use the present, past, and future of the indicative tenses, and eighth graders know how to identify the present subjunctive, commands, the present progressive, the conditional, the present perfect, and the imperfect tenses. Our eighth-grade collaboration happens with the eighth-grade humanities teacher, as well as with science, art, drama, and math classes.</p>	
Narrative 2024-2025	
<p>Ella is a very respectful student, as well as kind and helpful. Ella has an advanced Spanish level and has incorporated humor into learning. Ella learns best by speaking and listening and also by watching songs with the lyrics displayed. Ella loves everything we do in class: the games in circles, reading articles in Spanish every Wednesday, Project-Based Learning, and the Game-Based approach activities that happen every Friday. Ella's speaking and listening skills are excellent and continue to grow. When it comes to making progress in Spanish, Ella is in a phase where listening to songs and repeating the rhythm and rhyme greatly benefit Ella. Ella is and will continue to practice reading. The next steps for Ella are to keep practicing the following tenses and to continue to review those already learned: the imperfect tense, the conditional, the present subjunctive, commands, present progressive, and present perfect, given that Ella already knows how to use the past, present, and future tenses using paragraphs.</p>	

8th Grade Drama - Jennifer Salvucci Bent

	Gr 8 Fall
Drama Skills	
<i>Listens closely to directions</i>	4
<i>Demonstrates respect for the stage</i>	3
<i>Works independently, focusing attention on tasks at hand</i>	3
<i>Challenges themselves in text analysis and character building (does not merely do the bare minimum)</i>	N/A
<i>Encourages their peers onstage and works together to ensure the growth and connection of the ensemble</i>	4

8th Grade Drama - Jennifer Salvucci Bent

	Gr 8 Fall
Comments	
Subject description	
<p>Eighth grade is essential to the culminating study of the dramatic arts. Drama is intellectual growth, learning to trust your instincts, working with your ensemble, creating safe environments, and risk-taking onstage. It is confidence in making mistakes and it is about the process over time. At the start of the academic term students engage in the first unit of study: Interviewing 101. Because eighth grade is a year of new possibilities and development before transitioning to secondary schools, students begin the process of next school selection, and interviewing has been incorporated into the drama curriculum. This essential skill is not only used for secondary school preparation, but for college and job interviewing as well. Students are lead through a series of interview questions, enhancing their oral presentation skills as progress toward mock interviews. Students begin to realize how like physicality is extremely important in our stage productions, their physical self is used as a marker in interviews. Posture, a firm handshake, eye contact, and culture serve as essential factors in the final interview. The eighth graders also learn the importance of dress in connection with specific situations, and how they should always remain true to who they are as a person: that their thoughts, instincts and reflections on life thus far, is a voice that needs to be heard. Though they will move on to connecting with a different ensemble, students are able to reflect on everything that has brought them to this point in their lives and how their time at Cambridge Friends School has shaped their views on the world. Once the interview unit has concluded, students change course and begin the journey of piecing together a culminating stage production. Using every one of the skills sets incorporated into the first three years of the Cambridge Friends School Drama curriculum, this year's eighth graders will be performing <i>Newsies</i>, <i>JR.!</i> The beginning steps of this process is for the students to identify the through-line of the play, the symbolism and the themes behind it, and then begin the process of text analysis for their individual character(s). From there, we will begin the blocking process, as well as lighting and sound along the way. Looking forward to our final adventure together!</p>	
Narrative 2024-2025	
<p>Ella is always enthusiastic and energetic and continually brings thoughtful discussion questions to the group, no matter what the topic may be. Highly invested in our Next Schools process, Ella continued to explore topic conversations for interviews at the high schools, speaking at length with teachers to help access valuable traits and key elements of personality. Ella demonstrates a deep understanding of self and was respectful and focused as peers sought teacher help in determining the same. Throughout the fall semester, Ella has remained excited and committed to the eighth-grade musical. Despite not identifying as a singer, Ella is excited to explore music and movement throughout our process. Ella is a valued member of our eighth-grade community.</p>	

8th Grade Visual Art - Sami Martasian

	Gr 8 Fall
Visual Art Skills	
<i>Follows art studio procedures and meets art studio expectations for behavior</i>	4
<i>Demonstrates respect for classmates</i>	4
<i>Actively listens and is attentive during instructions and demonstrations</i>	4
<i>Demonstrates persistence working on projects and asks for help when needed</i>	4
<i>Communicates knowledge, emotions, and understanding using a range of mediums and materials</i>	4
<i>Experiments and explores a variety of materials and tools</i>	3
<i>Works cooperatively and collaboratively on visual arts projects and displays</i>	4
<i>Uses studio process on major projects, brainstorming, rough drafts, editing, and final drafts</i>	3
<i>Demonstrates independent work habits while supporting classmates</i>	3
<i>Reflects on personal history and completed work developing an understanding of personal process or growth</i>	4
<i>Communicates and gives feedback in a number of critique situations including one on one, small group, whole class, and public presentation</i>	4

8th Grade Visual Art - Sami Martasian

Comments	
Subject description	
<p>Eighth-grade has spent this semester honing personal style and practicing useful techniques to carry into their future art making. Each student began the school year by making a talking piece to be used in Restorative justice circles and community time. These were made with care and consideration of their connection to indigenous cultures that inform our understanding of Restorative Justice. Eighth-grade students then participated in making Alebrijes to be displayed on our Day of the Dead Ofrenda along with the rest of the middle school. All grades participating in the project first studied the life and work of Pedro Linares Lopez, who is credited with beginning the tradition. Though this is a yearly project, students approach it each year with different materials; this year the medium was colorful air dry clay and paint markers. Eighth-grade students then began their Surrealist self portrait project. Students began this unit by considering work by Leonora Carrington, Frida Khalo, and Kehinde Wiley, three artists whose work is very different from one another but each keen on using surreal elements to better express the emotional reality of their subjects. Face drawing techniques, both by measuring out the face using a classic figure drawing method and by observation in a mirror helped students begin their planning, which then developed into including expressive elements of their own. Students chose symbols, animals, backgrounds, or changes to their appearance to express their identities and inner emotional landscapes. Our next steps were to study shadow and highlight and paint mixing and application to finish these fabulous pieces. Eighth-grade students are currently concluding a linoleum printmaking unit. Students created a square design that is made in such a way that it creates a larger image when printed. Many students carved their linoleum to be 1/4th of an image, so that once rotated, a complete flower, planet, or shape is formed. Students experimented with different colorways and printed on both fabric and paper.</p>	
Narrative 2024-2025	
<p>This fall has been a productive time in the art room for Ella, who continues to make remarkable work independently or as part of a group. Ella's surrealist self-portrait was carefully planned, with a thoughtful underdrawing guiding thin layers of carefully mixed paint. Geometric shapes float around Ella in a dark background, a nod to this creative student's critical thinking. With a little extra studio time, Ella designed and built portfolio dividers to be used for all grades. Ella created a few, and then students in other classes studied them and replicated them to complete the set. The result was a genuinely positive impact in the organization of a space in the art room that students are responsible for and a moment of leadership for Ella. Linoleum carving and printing was a joyful task for Ella, who rises to the challenge of any project that involves 3D planning and precise material execution.</p>

8th Grade Physical Education - Angelo Valle

	Gr 8 Fall
Physical Education Skills	
<i>Comes to class prepared and ready to participate</i>	3
<i>Comes to class positive and cooperative</i>	3
<i>Listens attentively and follows directions</i>	3
<i>Demonstrates safe, responsible behavior that respects self and others.</i>	3
<i>Able to run and find their own pace</i>	3
<i>Demonstrates flexibility and coordination</i>	3
<i>Demonstrates developing throwing skills</i>	3
<i>Demonstrates developing catching skills</i>	3
<i>Demonstrates developing striking skills</i>	3
<i>Contributes to group and team initiatives</i>	4
<i>Demonstrates tactical understanding during team games</i>	3
<i>Demonstrates abilities to perform skills relating to specific team units</i>	3
<i>Understands specific terminology related to skills, positioning, and game play</i>	3
<i>Understands sportsmanship as a critical component of physical education</i>	4
<i>Demonstrates sportsmanship during gameplay</i>	4
<i>Able to accept game outcomes</i>	3
<i>Understands the value of physical activity for health, enjoyment, challenge, self-expression, and/or social interaction.</i>	3
<i>Receptive to teacher feedback</i>	4
Comments	
Subject description	
In the first semester of Grade 8 Physical Education, we began each class period with a pace run to warm up for the ensuing activities while developing conditioning and endurance. The focus then turned to coordination and flexibility through dynamic movements and stretches to prepare the muscles for activity. Through cooperative games and team-building activities, we focused on team cooperative skills before moving on to the competitive team games of soccer, football, and basketball. Throughout the semester, we worked on developing good sportsmanship and building the physical fitness skills involved in those sports, including kicking, receiving, passing, dribbling, shooting, throwing, catching, changing direction, and responding and reacting.	
Narrative 2024-2025	
Ella has had an excellent beginning of the year. Always bringing positive energy to the class and ready to participate fully, Ella jumps right into the pace run and dynamic stretches, then listens attentively to instructions for the ensuing activity. Ella accepts feedback and suggestions and demonstrates strong, improving skills and a solid understanding of tactics in all aspects of the class. Ella is a positive leader who is very supportive of teammates, has a strong sense of fair play, and knows how to create healthy competition. Notably, expressions of appreciation are offered throughout and at the end of each class, which exemplifies the Light that Ella brings to the community. Ella should continue along the current path toward excellence.
